

Problem-Solution Fit

Date	28 June 2026
Team ID	xxxxxx
Project Name	Voice-Based Concept Understanding Analyser
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] - Technical students preparing for placements/vivas. - Placement trainers and college coordinators. - Academic evaluators and engineering professors.	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] Restricted student budgets; requires standard laptops/phones with basic web browsers and microphones.	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Mock Interviews: Good feedback (<i>Pro</i>), but cannot scale for hundreds weekly (<i>Con</i>). Coding Platforms: Automated (<i>Pro</i>), but completely ignores spoken communication (<i>Con</i>).
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Pains: No instant feedback on technical speaking or filler words. Manual audio grading is exhausting for faculty. Frequency: Continuous during placement seasons and exams.	9. PROBLEM ROOT / CAUSE [RC] Manual review is too slow. Existing platforms only test written code, not speech.	7. BEHAVIOR + ITS INTENSITY [BE] Behavior: Practicing alone without tracking filler words like "um/uh". Intensity: High; students lose job offers due to weak articulation.

3. TRIGGERS TO ACT [TR]

Upcoming campus placement drives and college viva exams.

4. EMOTIONS BEFORE / AFTER [EM]

Before: Anxious, unconfident, and overwhelmed.

After: Relieved, confident, and motivated

10. YOUR SOLUTION [SL]

An AI web app that transcribes speech, detects technical gaps/filler words, and provides instant dashboard scores.

8. CHANNELS OF BEHAVIOR [CH]

ONLINE

Web browsers (Chrome/Safari) and student portals

OFFLINE

College labs and placement cells.
