Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
voice-analyzer-backend/
├── main.py
├── fresh_project_records_v2.db
├── requirements.txt
├── uploads/
└── templates/
    └── index.html
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	NA
Login Credentials (Demo)	NA
Platform / Hosting Provider	NA
Repository Link	https://github.com/snehavagu-source/Voice-Based-Concept-Understanding-Analyser-.git
Demo Video Link	

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

VOICE-BASED CONCEPT UNDERSTANDING ANALYSER (VBCUA)

Pre-requisites: [python 3.10+, ffmpeg, git]

Step 1: Clone the repository: `git clone <url>`

Step 2: Install dependencies: `pip install -r requirements.txt`

Step 3: Configure environment: copy `.env.example` to `.env` and add Gemini API key

Step 4: Run database migrations (optional, with SQLAlchemy): `python database.py`

Step 5: Start the backend server: `uvicorn main:app --reload --host 127.0.0.1 --port 8000`

****Step 6: Open Swagger UI at <http://127.0.0.1:8000/docs> or access live application directly at <http://127.0.0.1:8000/>****

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Large audio files require longer processing time.	Use audio shorter than 5 minutes.
2	Background noise affects transcription accuracy	Use clear voice recordings.
3	Simultaneous multi-user requests can delay server response.	Handled using asynchronous code to manage multiple tasks.
